Aesthetician Service Menu

Microdermabrasion: A highly efficient and safe exfoliation procedure used to remove dry, dead, superfluous skin layers every 4-6 weeks. This exfoliation treatment

immediately reduces the appearance of dry fine lines that are evident on aging skin, it increases the rate of absorption of skincare products, and provides a healthier more radiant appearance with no down time.

Dermaplaning: A highly efficient and safe physical exfoliation procedure used to remove dry, dead, superfluous skin layers, and vellus hair (peach fuzz) every 4-6 weeks. This exfoliation treatment immediately reduces the appearance of dry fine lines that are evident on aging skin, it increases the rate of absorption of skincare products, and provides a healthier more radiant appearance with no down time.

Glow Peel: The ZO Stimulator Peel is a quick and easy “red carpet peel” that can be done on your lunch hour. With three different acids, this peel leaves your skin healthy and glowing with no down time, redness, or peeling.

3-Step Peel: The 3-Step Peel is a moderate peel that can be done to help improve fine lines, texture changes, pigment, melasma, and acne scarring. There is minimal downtime with this treatment.

Tinting: Using customizable semi-permanent dye, tinting is used on your eyebrows or lashes to create a fuller look. This treatment will last up to 4 weeks.

Lash Lift: This service enhances and lifts your natural lashes, lasting up to 8 weeks. We recommend pairing a lash lift with lash tint.

Brow Lamination: Brow lamination is a three-step process that straightens the brow hairs up in your desired place, leaving your brows shiny and smooth. This can also be combined with a brow wax and tint.
